This is a collection of random snippets I've made. Hopefully it will grow over time.

Table of Contents

Notation Colour Blocks

https://github.com/deathau/obsidian-snippets/blob/main/notation-colour-blocks.css

A bunch of different coloured blocks, inspired by the block colours offered by Notion.

Realistic Highlights

https://github.com/deathau/obsidian-snippets/blob/main/realistic-highlight.css

A fancy-looking highlight that looks like it was made with a highlighter pen

---

Inline Block Embeds

https://github.com/deathau/obsidian-snippets/blob/main/inline-block-embeds.css

Inline-ish block embeds, which I mostly use for adding some block-embedded tasks to the end of a task list

---

Clutter-Free Headings

https://github.com/deathau/obsidian-snippets/blob/main/clutter-free-headings.css

WYSIWYG-ish headings which line up headings, show the formatting markers when editing and replace them with a muted "H1", "H2" etc when not the active line

---

Clutter-Free Formatting

https://github.com/deathau/obsidian-snippets/blob/main/clutter-free-formatting.css

Formatting which is reduced and hides when not on the active line. It still leaves the space though, so as to prevent weirdness with cursor movement and selections.

Checkboxes

https://github.com/deathau/obsidian-snippets/blob/main/checkbox.css

Checkboxes with different statuses (requires Obsidian 0.12.0+)
